

Once logged into RAILTRAC, click on the Reference tab. Next, select Routes, then Route Codes.

In the Get Data For Route Code Maintenance box, narrow down your search. Or click All to view all route codes.

The screenshot shows the 'Get Data For Route Code Maintenance (TIFFANYM @ RTOL_DEV)' dialog box. At the top, there is a dropdown menu set to 'SYSTEM DEFAULT' and three buttons: 'Set as Default', 'Save Setup', and 'Delete Setup'. Below this is a table with three columns: 'Column', 'Where', and 'Value'. The table contains the following rows:

Column	Where	Value
Route Code	=	
Route Description	=	
Destination City	=	
Destination State	=	
Origin City	=	
Origin State	=	
Return City	=	
Return State	=	

Below the table are two buttons: 'Add' and 'Delete'. At the bottom of the dialog box are five buttons: 'OK', 'All' (highlighted with a red box), 'New', 'Cancel', and 'Setup'.

The find column can be used to narrow down the search criteria. Remember to only look at route codes that are active status = Y. Also, look at One-Way/Round to ensure the right type of route code One-Way/Round has been selected.
