

**TRANSPay® Release Notes – Version TP10.0.1  
7/16/14**

THIS DOCUMENT AND CONTENTS IS ONLY FOR THE USE OF BDS AGENTS AND LICENSEES. IT CONTAINS CONFIDENTIAL INFORMATION AND TRADE SECRETS OF BOURQUE DATA SYSTEMS, INC.. UNAUTHORIZED USE, DISTRIBUTION, OR DISCLOSURE IS PROHIBITED.

1. Adds the ability for a user to resubmit accruals in bulk. By looking up and subsequently highlighting the shipments, this is a time effective way to re-accrue a unit train or multiple shipments at once.
2. The accrual resubmit screen also has additional look up fields to assist a user to pull up those shipments that may need to be bulk re-accrued. Included in this are an Agreement Number, Origin City, Origin State, Destination City, Destination State, Unit Train ID, and Ship Date Range. A user can still look up shipments based on Carrier Code, Carrier Name, Bill of Lading, Equipment Initials, and Equipment Number.
3. The ability to do a bulk override of a Unit Train Car Count has also been added. Unit Train IDs will need to be assigned to the trips in RAILTRAC in order for this to work. This allows for the updating of a car count en masse for a particular Unit Train shipment.
4. Added audit reports for Rate Requests and Payment History that show all records.
